IMDB Movie Analysis

Comprehensive analysis of 379 movies from 2021-2024

Dataset Overview

379

Movies Analyzed

Complete dataset spanning 4 years

12

Data Attributes

Runtime, ratings, votes, gross collections

0

Missing Values

Excellent data quality

2021-2024

Time Period

Recent industry trends

Analysis Methodology

Data Cleaning

- Loaded CSV using Pandas
- Verified data types
- Removed unnecessary columns

Exploratory Analysis

- Structure analysis with info() and describe()
- Displayed first and last 10 records

Python & Pandas

Data manipulation

Matplotlib & Seaborn
